Introduction

XML and CSV file downloads are available on the Racing NSW web site for the following stages of each meeting:

1. Nominations.
2. Weights.
3. Acceptances.
4. Final Fields.
5. Interim Results.
6. Results.

The source of this information is changing to the Single National System (SNS). Our endeavour during this transition is to make the formats and data contained within these files, as consistent with the original as possible. The format of these files will remain the same; however, some of the field values are incompatible, such as Ids and will not match values from previous files. The following sections describe these changes in detail.

XML File Format

Element	Attribute	Change Description	Old Value	New Value
meeting	id	SNS values are different to the previous system	46307	5144763
meeting	weightsdeadline	SNS does not have times for this field	2017-02-22T16:00:00	2017-02-22T00:00:00
club	code	SNS values are different to the previous system	78	20902
club	associationclass	SNS does not have values for this field. They will all be empty	7	
race	id	SNS values are different to the previous system	227478	5113722
race	minweight	SNS does not have values for this field. Values are all "0"	54	0
nomination	id	SNS values are different to the previous system	188708	983703
nomination	trainernumber	SNS values are different to the previous system	41403	19352
nomination	jockeynumber	SNS values are different to the previous system	87175	862130

Examples for the old and new values are taken from the meeting at Coffs Harbour 27/2/2017, Race 1.

CSV File Format

Previously, some fields contained leading or trailing spaces. This will not be the case for the new files.

Some jockey names may have titles added. E.g. Ms Jane Doe.
